sense and simplicity

Highlights

Ambilight Spectra XL

Ambilight Spectra XL enlarges the screen even further by projecting a glow of light, that automatically changes according to the screen, from the back of the screen onto the surrounding wall. The colours of the halo support both relaxed and dynamic scenes, with a larger effect than before. The wall-adaptive function ensures that the colour of the light always matches the picture, no matter what the colour of your wall is. Get the bigger picture with Ambilight.

3D Max

Be enthralled by 3D movies in your own living room with the 3D Max. The combination of the fast display and Active shutter glasses bring real-life depth in Full HD resolution. Now all 2D content can be experienced in 3D and you can even control the depth of the 3D to your liking. Your TV is ready for the 3D Max experience by adding the 3D Max glasses PTA516 and a 3D compatible Blu-ray player (Accessory Philips PTA516 sold separately).

Perfect Pixel HD

Experience unrivalled sharpness and clarity with Perfect Pixel HD Engine. Each pixel of the picture is enhanced to better match the surrounding pixels, for a more natural picture. The result is a unique combination of sharpness, natural detail, vivid colours, superior contrast and smooth natural motion whatever you are watching. Clean and razor

sharp images result from artefact and noise detection and reduction in all content sources - from multimedia to standard TV. The Full HD screen with 1920 x 1080 pixels produces brilliant flicker-free progressive scan pictures with superb brightness.

Full HD LED Pro

Full HD LED Pro delivers extreme contrast and the world's most vivid 3D images. Enjoy breathtaking pictures and use up to 50% less energy with Philips award winning LED Pro! In the sleek thin design, over 1000 LEDs operate selectively in the display backlight. They generate brilliant light in bright image areas, and are dimmed completely in dark areas for the deepest black. Combined with the powerful Perfect Pixel HD Engine, the result is a stunning picture with extreme contrast, sharpness and vibrant colour. With LED Pro, black is black and white is bright.

1000 Hz Perfect Motion Rate

1000 Hz Perfect Motion Rate (PMR) creates extreme motion sharpness for clear and vibrant images in fast action films. The new Philips PMR standard shows the combined visible effect of the fastest panel refresh rate, Perfect Natural Motion and unique processing formula, for unprecedented motion sharpness

40 W SoundStage

Philips SoundStage with 40 W RMS output power is far more dynamic and powerful than anything heard on LCD TVs today. Now we can combine an ultra thin design with powerful TV sound. The TV stand houses an advanced ultra-thin speaker system. It combines deep, warm bass with excellent clarity. Also, in the wall-mount position you can enjoy the excellent sound experience, thanks to advanced processing corrections. Enjoy great sound and a thin design.

Smart TV

Smart TV for an easier and wireless TV experience in four areas. Net TV lets you enjoy a wealth of online apps on your TV: rent films, watch catch-up TV and enjoy social media. Stay in Control: change channels or enter text using your Smartphone or tablet. Use SimplyShare to enjoy photos, music and video from your computer, phone and tablet on your TV. Watch your favourite Programmes whenever you want: our programme guide helps you with Smart USB recording.

Energy
Label

Energy Class A

For many years Philips has pro-actively been working on the reduction of both on-mode and standby power consumption of its televisions and as a result most Philips televisions have achieved green EU energy labels in 2010. The greener the label, the lower the on-mode power consumption and the lower your energy bill and friendlier to the environment.
